

Main Features

This product stands out with its robust and functional structure. Here are the detailed technical specifications of the product:**

- **Wheels:** The product is equipped with 2 braked and 2 non-braked Kama Ø125 wheels. These wheels allow the product to be easily transported and fixed when necessary.
- **Total Weight:** The total weight of the product is 52 kg. This weight increases the durability and robustness of the product.
- **Material:** The exterior of the product is made of chipboard, while the interior is made of plastic material. This combination of materials gives the product both an aesthetic appearance and robustness.
- **Overall Dimensions:** The overall dimensions of the product are 757 x 1730 x 668 mm. These dimensions make the product suitable for a variety of applications.
- This description is prepared to emphasize the robust structure, portability, and versatility of the product. With features such as braked and non-braked wheels, chipboard exterior, and plastic interior, it offers a flexible solution that can meet various needs.
